Keeping parents and students informed

Term 3 Letter 2 Friday 13 January 2017

Tickets now available for 'Wizard of Oz'

Tickets can now be purchased for our whole Academy production 'Wizard of Oz' from Reprographics from Monday 16 January onwards. Tickets will cost £4 adults and £2 students/concessions. Please ensure you complete a ticket booking form which is available from either Reprographics or Reception or the form can be

downloaded from our website news/wizard of oz section. Alternatively the form is also attached to the last page of this letter if you wish to download it and complete. Booking request forms must be handed in to Reprographics along with payment.

There are a couple of provisos:

Student performers should buy tickets for family and friends outside of the Academy only. Student audience members who are not being accompanied by parents will be allocated a seating section according to their year group. Tickets will not be sold to students on the Academy banned list.

Please note the show will run over two nights on Monday 6 and Tuesday 7 February with doors opening at 6.30pm for a prompt 7.00pm start. The Academy's external doors will be locked at 6:50pm and no late arrivals will be admitted. Rehearsals are going really well and students have created some magnificent set scenery. So follow the yellow brick road; the journey's about to begin!...

Year 7 Academic Tracking Day

A letter detailing the organisation of this day has been issued to all students and emailed to parents as well.

Please complete the appointment sheet which accompanied the letter stating your preferred session time. Form Tutors will be responsible for arranging the appointments and will do their best to accommodate your first preference. A confirmation slip will be issued.

The day will take place on Thursday 26 January and students will be required to attend the Academy as normal and follow their timetable for Thursday. They will be released from lesson to attend their meeting. If parents have an evening appointment, students may wish to go home at the end of the Academy day and return with their parents if this is convenient. However, students must still be in uniform for evening appointments.

Form tutors will have copies of students' Term 1 and Term 2 reports to help discuss their educational progress so far this academic year and agree targets.

Sainsbury Active Kids promotion

This begins again on January 25 so please, if you shop at Sainsbury's, remember to ask for your vouchers at the till when you have paid. Send them in to post in our special Sainsbury box outside Reprographics.

Meeting with former Ashcroft now Oxbridge students

Selected students in Years 10, 11, and 12 gathered in the auditorium this week to meet four former high achieving students who are now studying at Oxbridge. They spoke about their life at university and presented slide shows of some of their experiences so far.

It was an interesting get together and our students were eager to ask all sorts of questions about university life. It was good to meet up with Daniel Oluboyede now reading medicine at Cambridge, Max Gibbins now reading Natural Sciences at Cambridge, Matt Lucas now reading Physics at Oxford and Rebecca Davies who is in her last year at Cambridge reading History.

Year 9 Immunisations

There is a catch up session on Wednesday 18 January for anyone who missed their immunisation slot this week.

Please contact the Welfare Officer to arrange this as soon as possible. A consent form signed by a parent is required before this can go ahead.

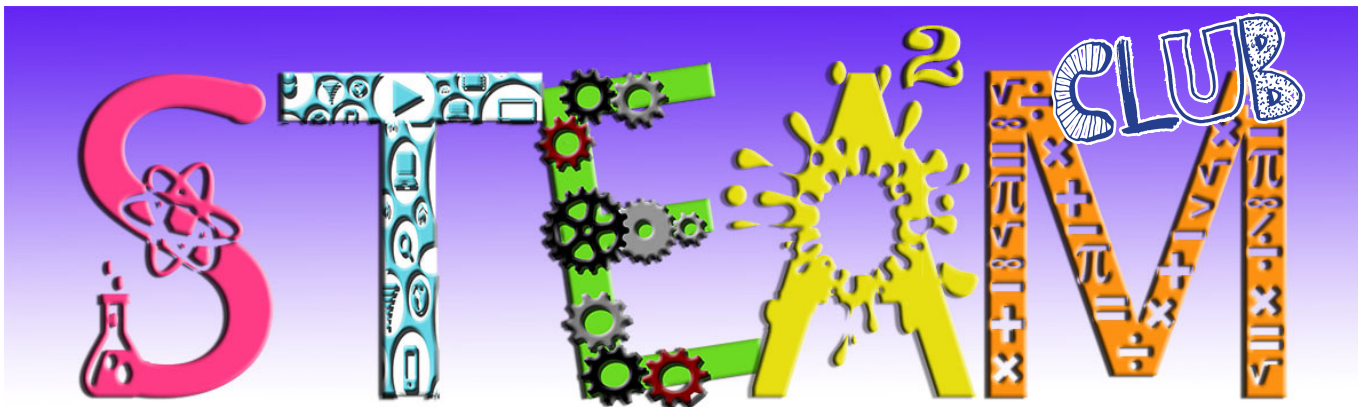

French Spelling Bee

The Grand Final of the Spelling Bee competition took place this week during a Year 7 Assembly. The four winners were:

- 1st place - Mees Visser 7T3
- 2nd place - Marguerite Vanning 7T2
- 3rd place - Ateeq Dar 7T4
- 4th place - Mahad Mahamud 7T3

A huge well done to all the participants, they have been brave to show their commitment to French and they have accumulated valuable experience with their involvement in this contest. The preparation for the competition has been done in several phases, over a period of two months, which means that the students have shown resilience and motivation towards learning the vocabulary. They will benefit from this experience if they have signed up for the Lille trip, and they might also have the chance to show their skills again as the MFL department is looking into signing up for the regional phase of the Spelling Bee.

The new rotations of STEAM commenced this week and it was indeed full STEAM ahead! Here is the fantastic breakdown of what the STEAMies did this week in their new rotations:

In Mr Mensah's Explaining Mysteries with Science Club, the Year 7 STEAMies looked at a series of demonstrations of static electricity and how current is generated to explain some mysteries. Mr Mensah demonstrated how static electricity can be induced in a stream of water with a balloon and the group watched a video on how strange hexagonal clouds over the Bermuda triangle could be the cause of large storms which causes accidents and also how tonnes of methane gas released underneath the ocean reduces the density of water drastically, therefore causing ships to sink. Wow!

In Mr Revelant's Maths of Language Club, the Year 8 STEAMies watched a clip from the movie Arrival and experimented with linguistic techniques to communicate to an alien species that has no face, hence no facial expressions, and has no words of communication. They learned that they would need to understand the alien species first and then develop a new "universal" language, which would take a very long time to compile the vocabulary for, but the STEAMies were able to

create some greetings which didn't scare away our visiting aliens or create an intergalactic war after all. Phew!

In Ms Nikleka's Cooking Club, the Year 8 STEAMies made pizza! They chose their toppings, washed and cut the vegetable toppings, cut and grated the cheese, and helped Ms Nikleka to shape the dough into a pizza base, before baking it in the oven. When the pizzas reached the staffroom, they were devoured in a flash! Several staff members gave positive tasting reviews, such as Mr Barry from English - "As a long-time fan of pizza, and an honorary member of the mailing lists of Dominoes, Papa John's and Pizza Hut, can I just say a very big thank you to the STEAM club for that delightful afternoon snack! The cheese was marvellously melted and the toppings were superbly spread" and Mr Anson, Examinations Officer - "My veggie slice was lovely! Thank you, STEAMies!". Yummy!

In Mr Morrissey's Rocket Car Club, the Year 9 STEAMies looked at rocket powered cars and how they work. They investigated how rocket power cars are made, including the technical processes that would be involved. One particular example investigated was the Bloodhound SSC car, that is trying to beat the current land speed record of at 763.035 mph, as set in October 1997 by British Royal Air Force pilot Andy Green driving the jet-powered Thrust SSC. Awesome!

In Mrs Aldred-Hall's Textiles Rocket Club, the Year 9 STEAMies found out what E-Textiles are and their potential application in Design. They then looked at the Rocket key ring torch project and began preparing the component parts. As an extended activity they also watched a short video clip about Design Studio XO who combine Fashion Design, Engineering and computing to come up with unique and innovative Design such as a drone dress. Super smart!

STEAM are looking forward to more exciting sessions next week, along with the introduction of Tournament of Minds, the new STEAM House Competition coming up, which will be run by Ms Dowson and Ms Khan during Terms 3-4. Further details will be released soon!

ARTiculation Competition Internal Heat

The ARTiculation Prize is a nationally acclaimed annual event designed to promote the appreciation and discussion of art. ARTiculation takes place in 9 regions in England. Each region holds a Regional Heat and supporting outreach workshops. Schools are required to hold an internal school heat from November to early January to select a student to represent their school at the Regional Heat. In the London area, schools will be required to enter a quarter final where students will be selected to go through to the London Regional Heat held at the National Gallery.

Our Year 12 IB students participated in the ARTiculation internal heats in the Auditorium last week. Each student is invited to deliver a ten minute presentation to an interested audience about a work of art, artefact or architecture of their choice. Mr Barker, Mr Mitchell, Miss Di Bartolo and Mr Gray were asked to assess each presentation as a whole, looking at content, structure, delivery and the speaker's original approach and unique potential. The presentations were of excellent quality and the judges deliberated for quite some time. Finally they awarded places as follows:

1st place	Helen Webley Brown for her 'Numbus' presentation
2nd place	Freya Lewis for her 'The Widow I' presentation
3rd place	Dominic Bonillo Castro for his 'Terminator Z' presentation

Helen will now go through to compete in the quarter-finals at the Courtauld Institute on the 18th January. If she is chosen as a region finalist, the ARTiculation Symposium and Finals take place at Clare College, Cambridge in March. The Symposium is designed to engage students in looking at and talking about art and architecture, as well as offering an insight into university life.

Year 11 Info Evening

Thank you to all the parents and students who came along to the Year 11 post mock information evening. We do hope you found it interesting and helped give you ideas and ways to support your son/daughter in their revision.

Many of you purchased revision guides on the night but if you were not able to do so on the evening revision guides are still available while stocks last. They can be purchased at educational prices and are at least half the price of those in shops such as W H Smith etc.

We also have past exam papers available which are printed in house so must be pre-paid to order.

All the guides listed opposite are available from Reprographics during breaktime or before or after the school day.

New to our collection of revision resources are past papers for Maths at £2.00 per pack

Effective Study Technique of The Week – Spacing

Start with the videos <https://www.youtube.com/watch?v=3WJYp98eys8> and <https://www.youtube.com/watch?v=eVajQPuRmk8>

Spacing – Your brain is fairly similar to a muscle – it is essentially lazy and does not want to waste energy – it will not learn something unless it seems important – having to recall something repeatedly over extended periods of time tells your brain that it is worth remembering and so the knowledge is embedded in the connections in your brain – the more you retrieve that knowledge the stronger your memory will be. Simple repeating is not good enough – it needs to be combined with some of the other techniques. You need to repeat the training over time to develop your memory and skills.

Ashcroft Technology Academy
TICKET REQUEST FORM

Doors open at 6.30pm for a prompt 7pm start
 £4 Adults, £2 Students/children/senior citizens

Ticket request forms will not be accepted after Thursday 2nd February 2017
